SUMMARY

I am a person passionate about technology since I was a child when I had hours of fun playing on the computer. In 2020 I got to know the world of programming through casual research and decided that this would be my profession. In 2021 I joined the Systems Analysis and Development course at UNASP, where I was able to learn a lot about the subject, I have always been a person who likes to sketch his creativity, so fastly I identified with the Front-end side of the area and since then I have been studying daily to improve my skills.

WORKING SKILLS

Figma

Javascript

HTML

CSS

SQL

LANGUAGE

Portuguese

English
